

BILL CLARK

Executive Vice Chair, Power Systems
Operations Manager, Constellation

Bill is currently serving and the Interim Site Manager at Grande Prairie Generation, located in Grande Prairie, Alberta, Canada. The Grande Prairie site is operating 1 GE 7EA unit. He handles various responsibilities which included oversight of site safety, operations and maintenance, projects, outage management, NERC, environmental compliance, and IT issues.

Bill previously was the Site Manager of Handsome Lake Energy. He has 20 years of experience managing, operating, and maintaining the Pratt and Whitney FT-8 Twin Packs. Bill spent six months aiding in the start-up of the first PWPS FT-4000 located in Maryland when he was asked to return to Handsome Lake to serve in the Operations Manager position. He has also helped out other Exelon sites filling in as Site Manager, providing Lock-out /Tag-out training, Outage oversight, Human Performance Investigations and Winter Readiness Audits.

He has a broad background which includes Shift Leader in the start-up of a fiberboard plant, Quality Manager of an ISO 9001 electronics manufacturing facility, and service on a submarine in the U.S. Navy. Bill received his B.S. in Technical Management from DeVry University with a focus on Project Management. He served on the PW Power Systems User group as Vice Chair from 2006 to 2008 and as Chair from 2009 until 2011. Bill again volunteered in 2016 as chair of the PW Power Systems Roundtables. He also assumed the role of CT-Tech Chair in Spring 2017. In 2020 he accepted the position on the Executive Committee as Executive Vice Chair of Growth and Development and in 2022 now serves as the Executive Vice Chair, Power Systems.
